Question

- What data should I use?
- How to layout?

LAYOUT

Title: Page View

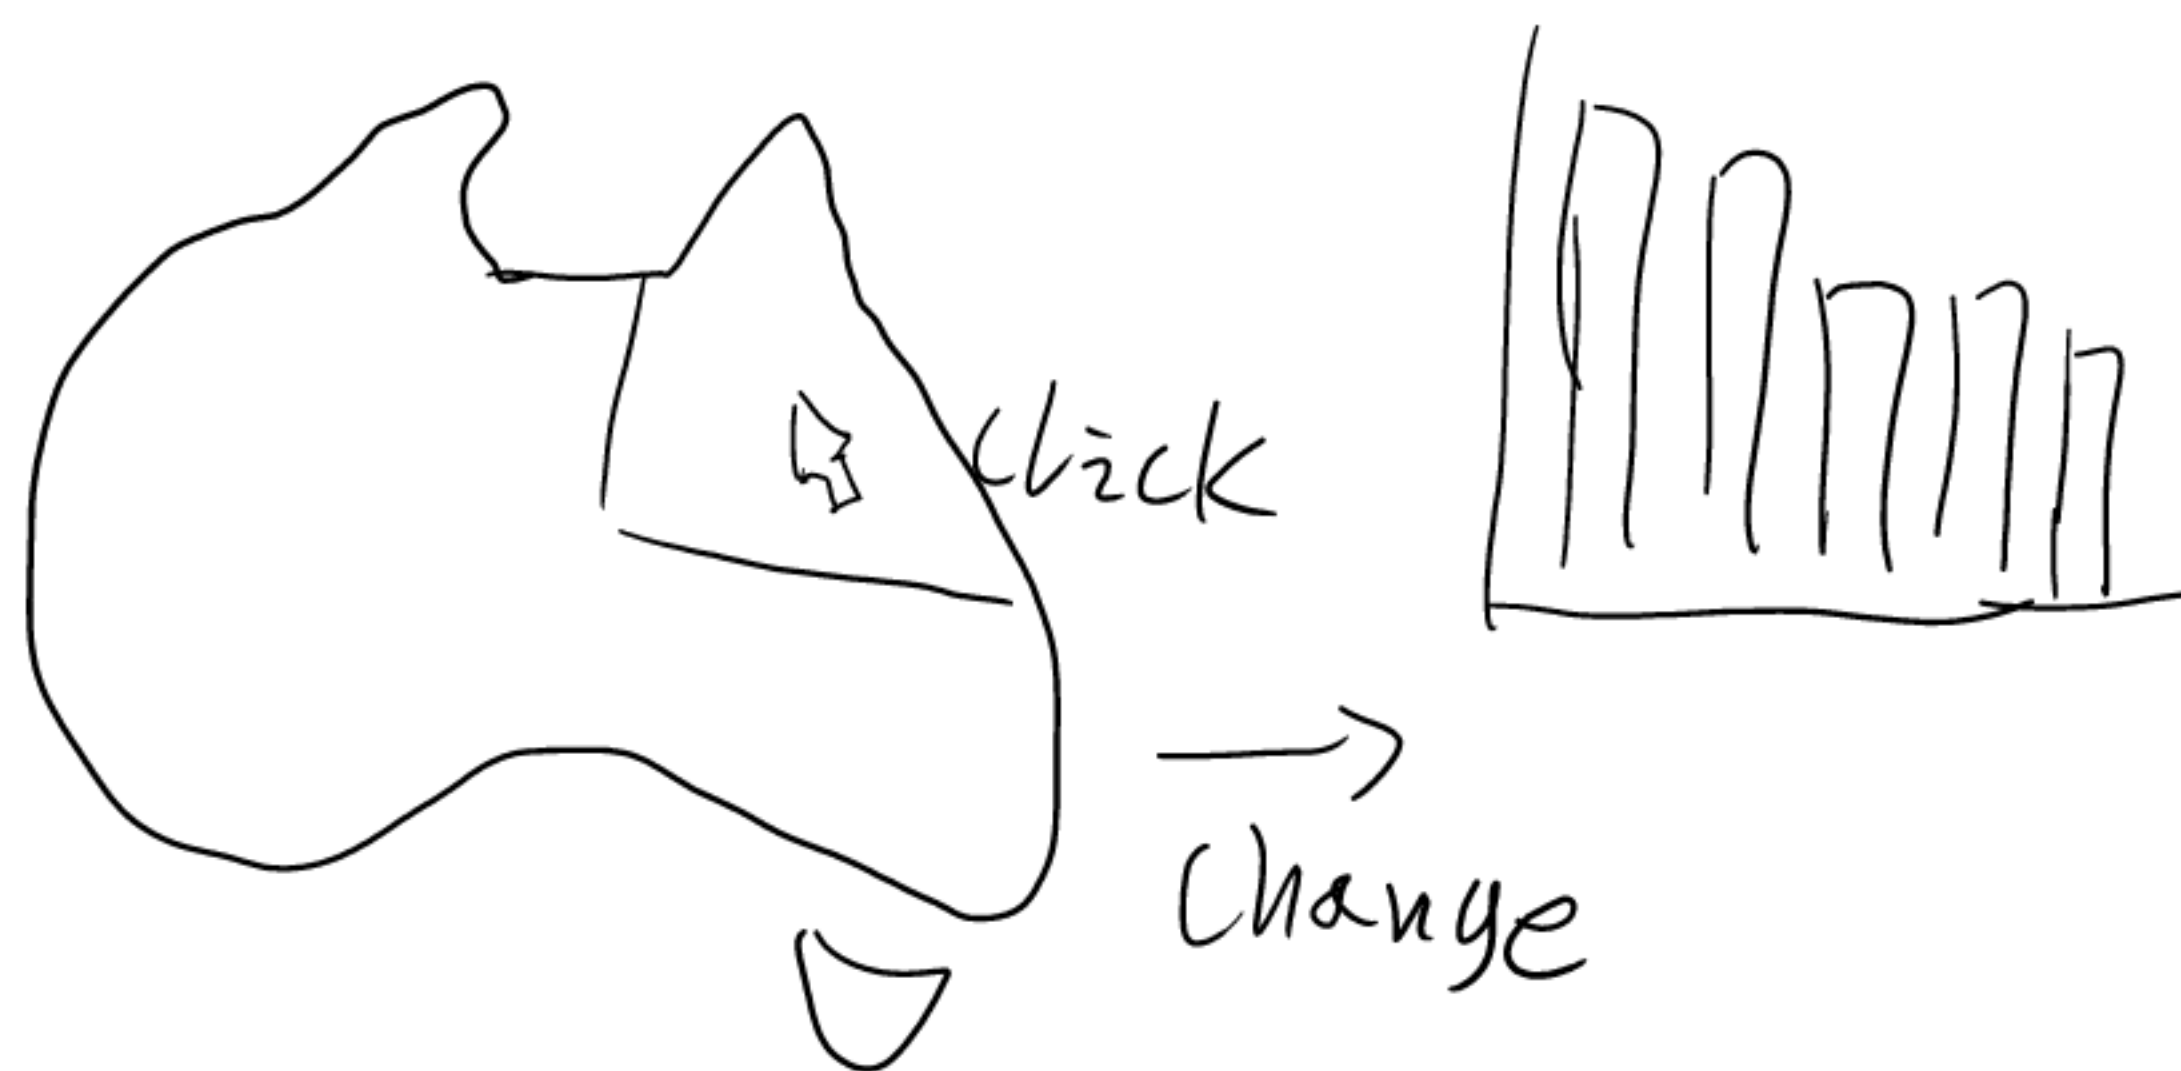

Author: Yifei Wang

Date: 10/16/2025

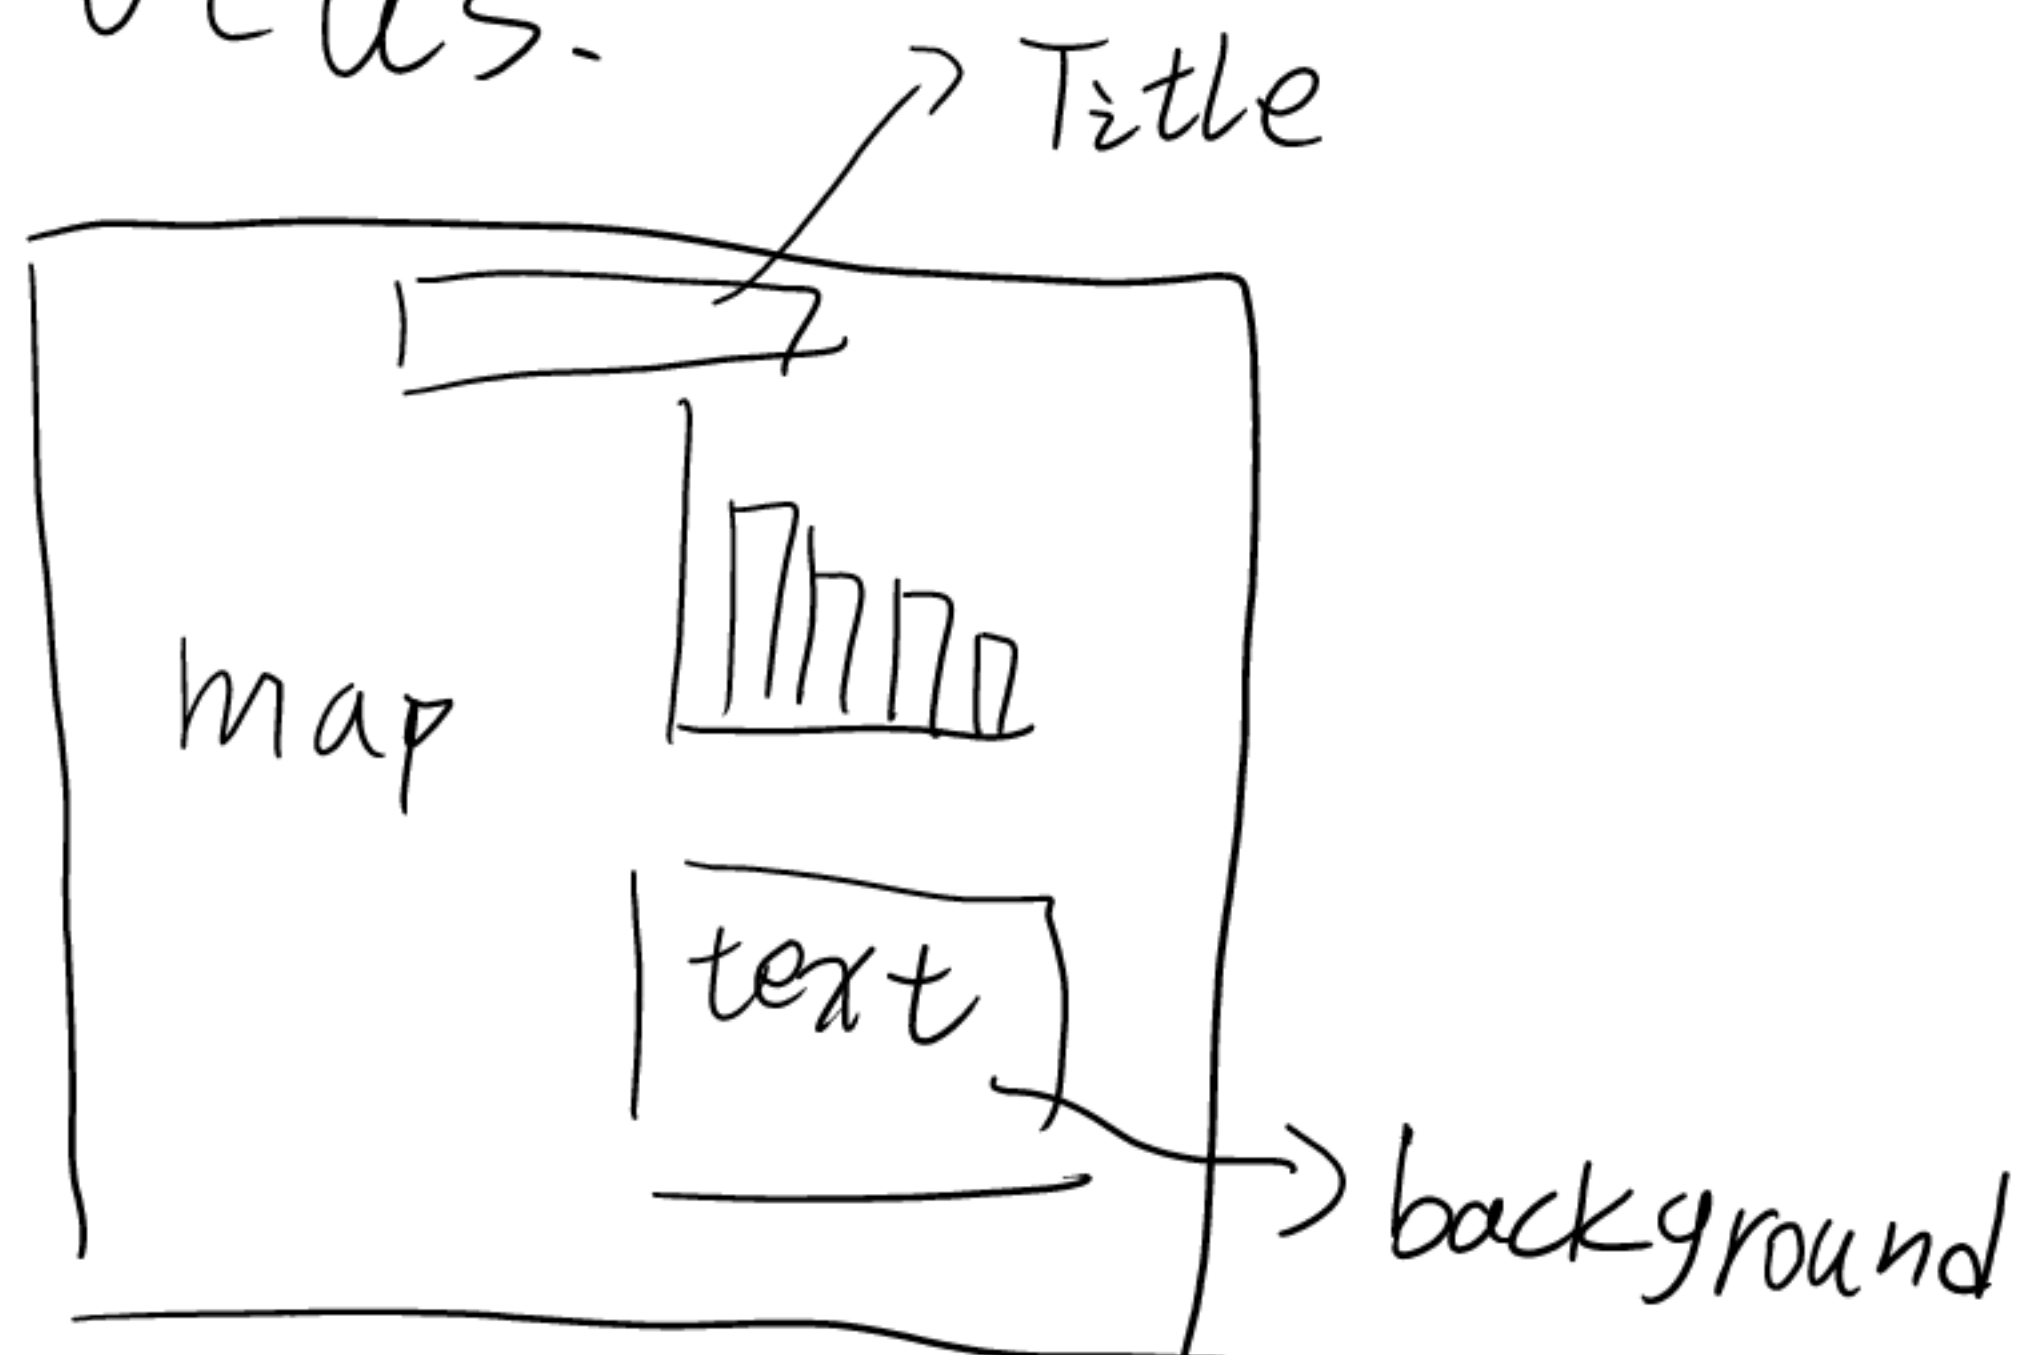

Sheet: 2

Task: Layout

OPERATION

Focus:

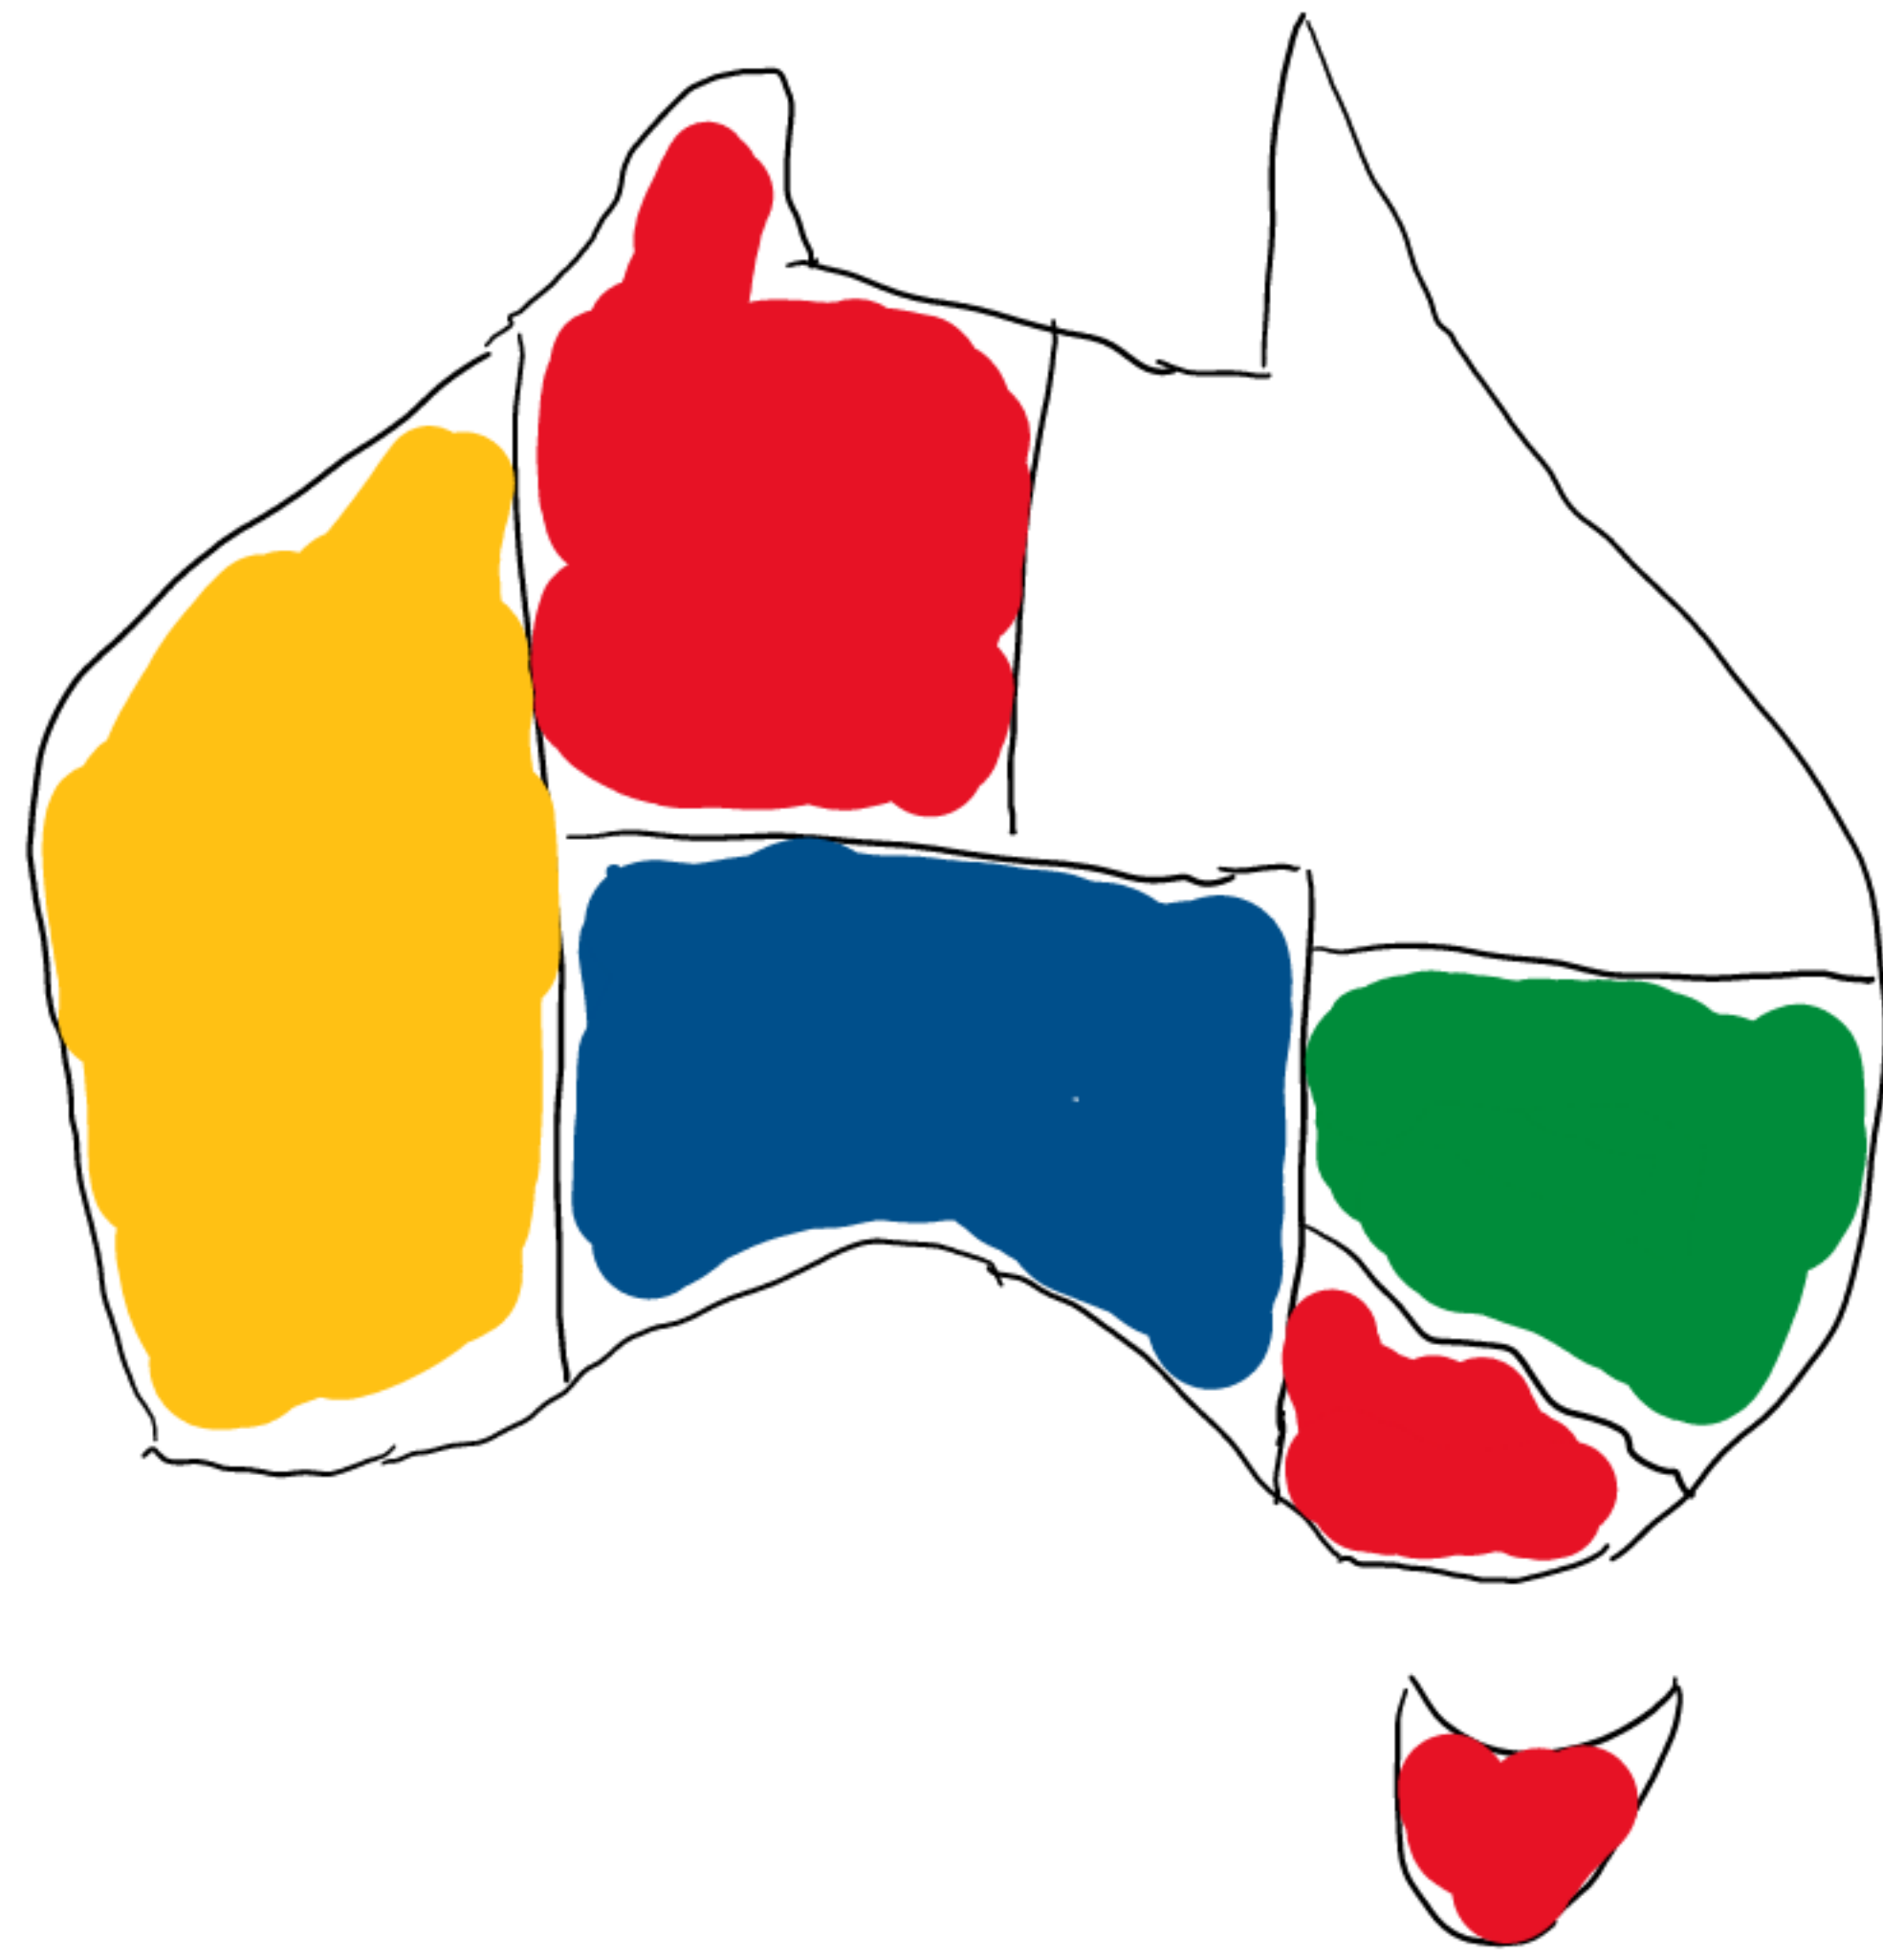

Discussions:

- A little few charts
- The Project background may not be conspicuous enough in the lower right corner

LAYOUT

Most popular restaurants by states

Different colors represent different cuisines:

Chinese: ●

Thai: ●

Japanese: ○ (white)

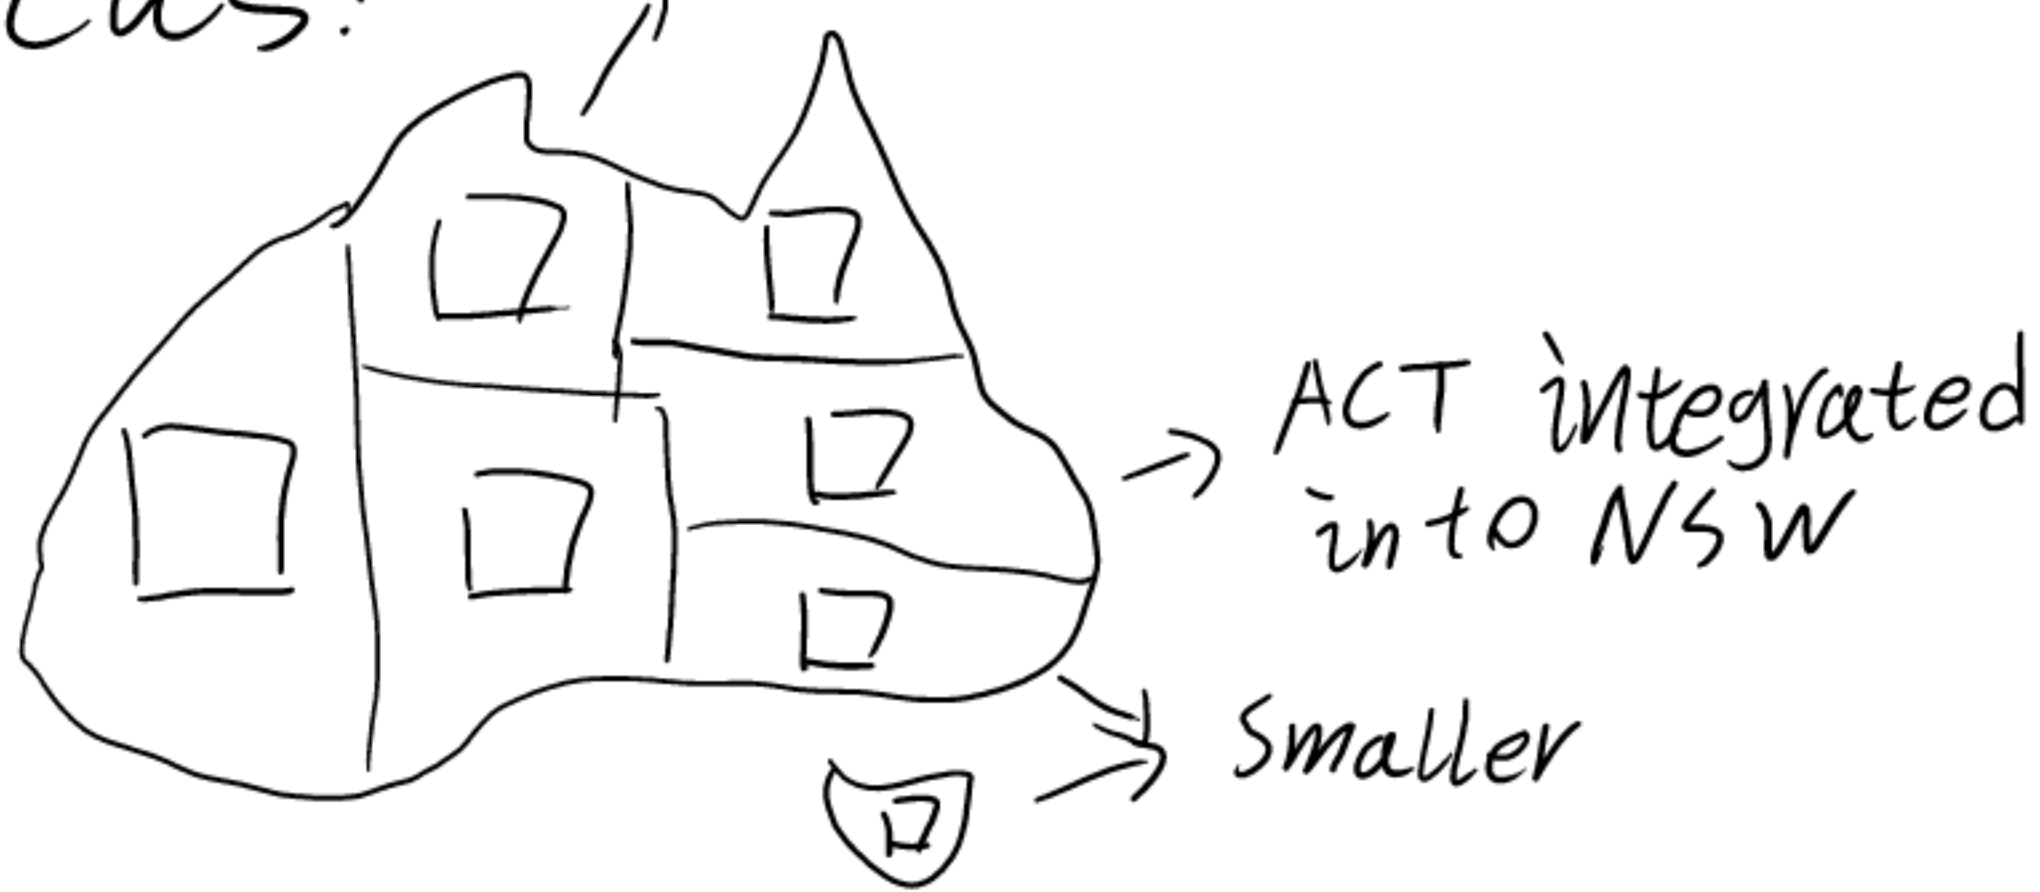

Italian: ●

Indian: ●

Korean: ●

Focus:

icon at the center of state

Title: Map

Author: Yifei Wang

Date: 10/16/2025

Sheet: 3

Task: Design the map

Component:

icon:

→ rice → Chinese

→ sushi → Japanese

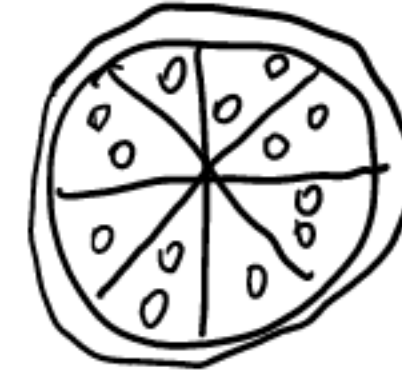

→ BBQ → Korean

→ Curry → Indian

→ Tom Yum Goong Soup → Thai

→ Pizza → Italian

Discussion:

- The color matching can distinguish the countries well, but it does not look good together.

- Do I need to display data?

- Does the ACT data need to be integrated into NSW, as the area is too small to see clearly?

State:  drop down menu

Title: Bar chart

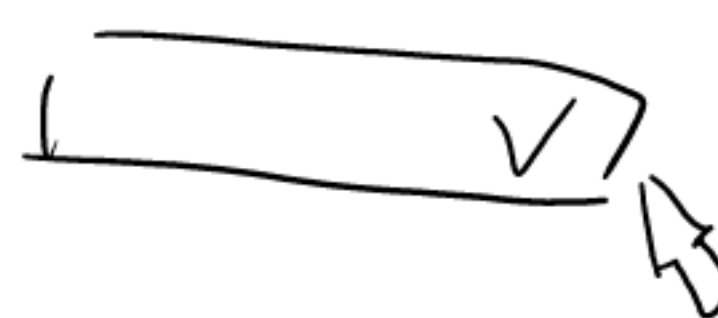

Author: Yifei Wang

Data: 10/16/2025

sheet: 4

Task: Design the bar chart

Operation:

change

Focus:

Rank form most

Discussion:

- Should the state name be used in full or in abbreviated form?
- Does it need sum?

Title: Final design sheet

Author: Yifei Wang

Date: 10/16/2025

Sheet: 5

Task: Final design

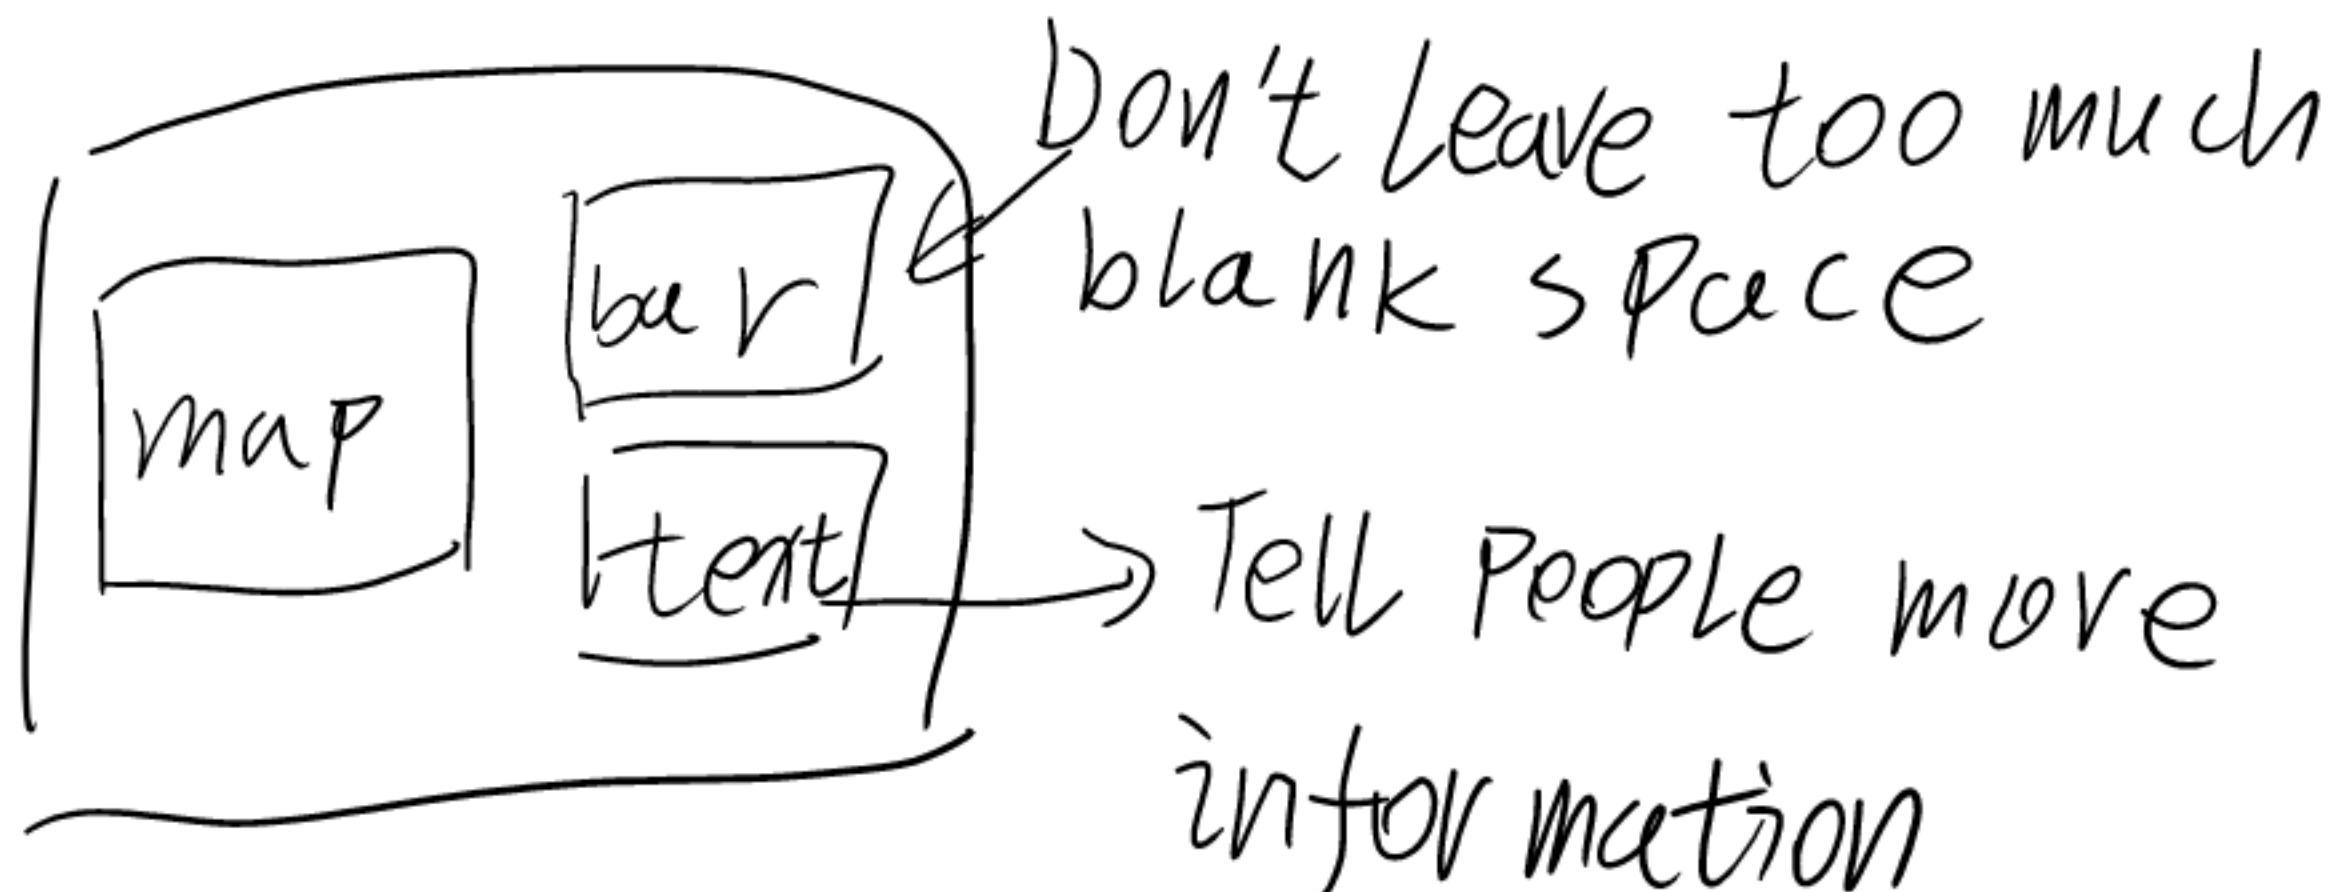

Operation:

or  click the state in map

Focus:

Detail:

If I use number of restaurants in the map will only have two colors (Chinese and Italian). So I chose the search volume ranking to make it more diverse.
